

DAMARLA VENKATA SIVA SAI NEELESH

Mangalagiri, Andhra Pradesh | +91-6281323064 | damarlaneesh@gmail.com

Github: github.com/LoneWolf014 | **LinkedIn:** [linkedin.com/in/neelesh-damarla-4222782a5/](https://www.linkedin.com/in/neelesh-damarla-4222782a5/)

Website: lonewolf014.github.io/WorldofNeelesh

SKILLS

Tools and Frameworks: Unreal Engine 5, Pygame, Git (basic)

Programming Languages: Python, C++, HTML, CSS

EDUCATION

B.Tech CSE (Computer Science and Engineering) with specialization in **Gaming Technology**

SRM Institute of Science and Technology, Ramapuram | **CGPA:** 8.80 / 10.0 | 2025

PROJECTS

NeonBounce – 3D Pong | **Unreal Engine 5** | C++ and **Blueprints**

September 2025 – December 2025 | [Itch Page](#)

- Implemented modular gameplay actor classes for paddle and ball behaviour using C++.
- Designed switchable camera system between 2D and 3D gameplay modes.
- Built shared-keyboard local multiplayer input handling.
- Published playable build on itch.io as first completed gameplay project.

Lost In Castle – 3D Action-Adventure | **Unreal Engine 5** | **Blueprints**

January 2025 – May 2025 | [Gameplay Demo](#)

- Final Semester Project during College
- Implemented fixed-camera transitions inspired by early PlayStation-era survival games.
- Developed spline-based tracking camera behaviour.
- Built tank-style player movement system aligned with cinematic framing.
- Implemented gameplay abilities such as torch equip and combat actions using GAS

Run Ben Run – Endless Runner | **Python** | **Pygame**

September 2024 – October 2024 | [Github Repo](#)

- Implemented obstacle spawning system for continuous gameplay loop.
- Created parallax scrolling background to simulate forward movement.
- Implemented jump-based player interaction with collision detection.
- Developed score tracking and restartable game-state logic
- First completed gameplay project developed using Python and Pygame

RayCasting Engine | **Python** | **Pygame**

Feb 2024 – Mar 2024 | [Github Repo](#)

- Built pseudo-3D renderer inspired by Wolfenstein 3D
- Implemented grid-based level representation.
- Corrected fisheye distortion using trigonometric projection adjustments.
